COMPANY PROFILE

1 WHOLE PLANNING

Based on the nature of the venue and the customer base, we maximize the use of space to ensure the value of the entire game and provide you with the most reasonable planning plan.

2 CONCEPT DESIGN

A professional design team, using visual design as a form of expression, and exploring user needs and gameplay as the dominant detail design. Starting from details, pay attention to every aspect of the product's function, structure, size, and material to achieve a perfect presentation of the entire solution.

3 DETAILED DESIGN

Starting from details, pay attention to every aspect of the product's function, structure, size, and material to achieve a perfect presentation of the entire solution.

4 INVESTMENT ACCOUNTING

Based on the client's investment budget, calculate equipment costs, propose rationalization suggestions, and maximize the client's investment profits.

5 PRODUCTION INSTALLATION

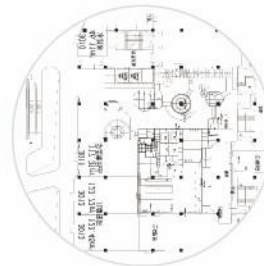

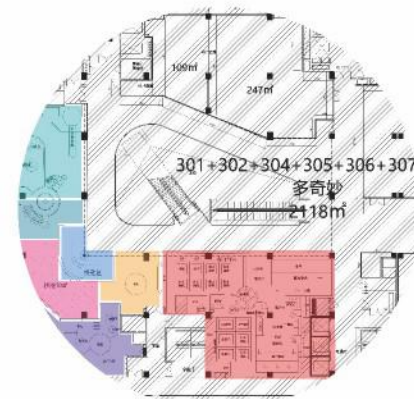

A professional production workshop and an experienced construction team ensure that the project is completed on time, with quality and quantity guaranteed.

6 COMMISSIONING TRAINING

Professional technical personnel debug the equipment to ensure its normal and safe operation; Provide on-site guidance and training on operating methods, precautions, and daily maintenance.

7 AFTER-SALE WARRANTY

An excellent service team ensures worry free after-sales service.

OUR ADVANTAGES

The international design style highlights the attractiveness of the amusement park.

Rich product categories including hundreds of amusement projects serving user groups of all ages.

A full case manufacturer from planning and design to manufacturing implementation.

Creative and cutting-edge "integrated" amusement design in the international industry.

Tailored indoor amusement projects ranging from 100 square meters to 1000 square meters with product as the core.

Meets and surpasses safety and quality standards in North America and Europe and America.

PARTNER ORGANIZATIONS

Aotexiang is one of the few companies in the entertainment industry with international project capabilities. Its success in the international market has enabled us to establish strong and systematic capabilities in the design, research and development, production, construction, and maintenance of family amusement centers, and has always been at the forefront of the industry.

We are not just a simple product supply relationship with our customers, but a cooperative partner for mutual development and win-win. We will start with the client's project site selection and construction, assist them in equipment selection and overall planning, and design concepts and details based on the client's planning and objectives for the entire project.

We will share advanced amusement park design and operation experience from North America and Europe with our operator customers, so that customers not only receive amusement parks and equipment, but also can apply new international operation experience and methods, so that our products can bring high economic returns to customers!

We will install the amusement park in accordance with international safety standards to ensure that the customer's amusement park is safe, durable, and aesthetically pleasing in all aspects.

DOMESTIC BENCHMARK CASES

The products are not only sold throughout the country, but also exported to multiple countries and regions such as Hong Kong, Macao, Taiwan, Europe and America, Russia, Southeast Asia, the Middle East, and North Africa.

PROJECT CASES

Here, it is an area full of mystery and unknown, a space loaded with exploration and dreams~

The vast and ethereal starry sky, as a vast unknown space, constantly emits a mysterious aura. With the development of technology,

The mysterious veil of the universe is constantly peeling off in front of people.

We can see the emptiness, darkness, and danger of the universe, as well as the depth, splendor, and wonder of the starry sky. And in the eyes of the children,

Interstellar space is a different sight: it is colorful and has a magical attraction;

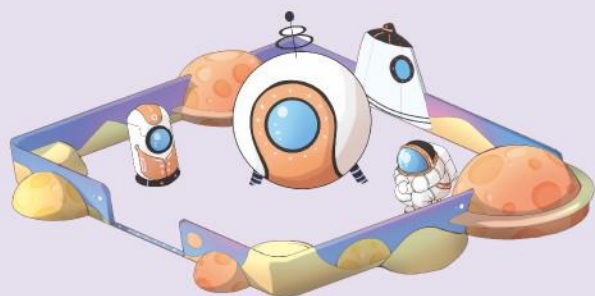

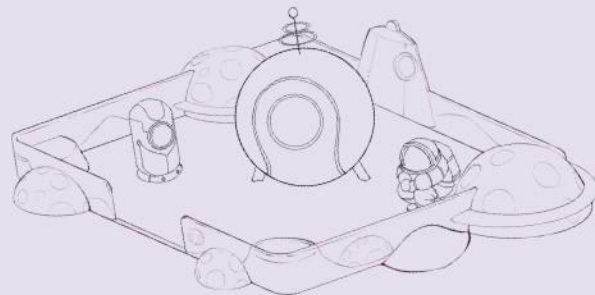

It is filled with bizarre scenes everywhere,

Scattered with wonderful strange objects; It is full of hope and surprise.

CLIMBING EQUIPMENT

Using PA imported from Germany and African teak wood as auxiliary materials, it is formed after anti-corrosion, moisture-proof, waterproof, and moth proof treatment. It is sprayed with reliable protective layer of imported outdoor polymer paint, which has the advantages of weather resistance, durability, resistance to cracking, deformation, and decay. The main material is national standard galvanized steel pipe, which is processed through more than ten processes such as bending, polishing, washing, galvanizing, and painting, Outdoor activities can also better prevent corrosion from rain, wind, and sun, providing sufficient protection for children and adults to play.

Climbing walls allow children to touch rocks, stretch their limbs, sway their bodies, stimulate their brain's learning ability, and have significant benefits for both physical and intellectual abilities.

✧ PARADISE ✧ RELATED FACILITIES ✧

TINY FARM

Nowadays, children living in big cities rarely have the opportunity to experience the scenery of the countryside firsthand. However, if a theme style similar to ecological countryside can be placed in a mischievous castle, children can feel a sense of being away from the hustle and bustle of the city, and experience a comfortable, fresh, and pure rural life that returns to nature.

PARADISE RELATED FACILITIES

COLLEGE OF ENGINEERING

Design philosophy:

Cultivate children's character of loving labor and being united and cooperative from an early age. Through the process of transporting building blocks and bricks, children can gain a sense of achievement and satisfaction, which not only has educational significance but also plays a role in exercising their body and mental development.

Material:

The internal steel structure and environmentally friendly flame-retardant wooden board are molded, and the external environmentally friendly soft foreskin is used for soft packaging, ensuring the safety of children without collision.

Configuration:

Main cartoon villa, tower crane, small cart, conveyor belt, lane, pulley, supporting architect's clothing and safety helmet.

Functional gameplay:

Children can put on clothes and safety helmets to build walls on the first floor of the villa (unfinished walls). Children on the ground can also use tower cranes to control the basket up and down, transport the building blocks on the ground to the second floor, and then build the wall after the children on the second floor pick them up; Children on the first floor can also use conveyor belts, pulleys, or small carts to transport building blocks to the second floor for construction.

COLOURFUL SAND POOL

The children's sandbox is covered with environmentally friendly sand in a semi enclosed environment, equipped with various tools such as small slides, small wheels, and sand traps, allowing children to fully unleash their creativity in the colorful sandbox. At the same time, this is also a good parent-child project, where children build their dreams with the accompaniment of their parents, and the whole family participates in it, enjoying it harmoniously.

Now, we have added theme elements to the traditional sandbox, allowing it to detach from the accessories of the Naughty Castle. In addition, with the provision of various amusement facilities, the theme sandbox can now independently support the operation of a park.

Customized according to customer needs

MATERIAL

Nanoparticles:

The particles are uniform and not prickly, clean and hygienic, washable without fading, and have no pungent paint smell.

Natural sand:

The advantages are natural, relatively clean, and the particle size is appropriate, which is not easy to cause physical damage, and the price is also reasonable.

Cassia seed:

Selected cassia seeds grown in their original country, after dust removal and polishing treatment, have large particles and good color.

Wood particle sand tank:

Natural and environmentally friendly material selection, smooth rounded corners without burrs, soothes baby's emotions, and develops baby's intelligence.
